

Exhibit A

Curriculum Vitae of Alan E. Brill, CISSP, CFE

Alan E. Brill is Senior Managing Director for Technology Services of Kroll Ontrack, and is the founder of Kroll's global High-technology Investigation and Computer Forensic practices. He has an international reputation in the areas of computer/communication security, technology crime response, and the application of the forensic sciences to the challenges of electronic evidence. At Kroll and Kroll Ontrack, his work has ranged from large-scale information security reviews for multi-billion dollar corporations, to criminal investigations of computer hackers, frauds on the Internet, identity theft, misappropriation of intellectual property, as well as telecommunication-related frauds.

Prior to joining Kroll, he was Director of the Information Systems and Information Security Bureau of the New York Department of Investigation, where he served as the senior government official with responsibility for information security, and as a Deputy Inspector General in the New York City government.

Alan Brill was also Director of Professional Services for Ed Yourdon's Yourdon Consulting Group. His work there involved the extension of the systems design methodologies of Structured Analysis and Structured Design, and consultation with major government and defense firms to implement these techniques. During this period, his internal security and control technique formed the basis for the National Aeronautics and Space Administration standard for design of secure systems.

At the international accounting firm of Ernst & Whinney (now Ernst & Young) he served as Senior Manager in the information security practice, and was the co-founder of that firm's Data Systems Security Review practice. While at E&W, he served as the public accounting profession's representative to the EDP Auditors Foundation Professional Certification Board, and helped to establish the criteria and examination for the Certified Information Systems Auditor credential.

He has also served as system designer at Chase Manhattan Bank, and was on the design team for the Apollo Project Ground Support System at the NASA Manned Spacecraft Center in Houston.

In the United States Army, he served as a Project Officer on the Army General Staff during the Vietnam War, as an advisor on computer/information security policy in the Office of the Secretary of Defense, and as military liaison to the New York City Police Department. He completed his service with the rank of Major, having also done work in Kuwait and with the NATO Peace Stabilization Force in Bosnia.

Mr. Brill has served as a visiting faculty member in the computer crime investigation programs of the United States Secret Service, the FBI Academy, the Federal Law Enforcement Training Center, and the Federal Financial Institutions Examination Counsel. He holds BA and MBA degrees from New York University. He is an honor graduate of both the United States Army Command and General Staff College and the National Defense University's National Security Management Program. He has also lectured for the John F. Kennedy School of Government at Harvard University. His

Curriculum Vitae of Alan E. Brill, CISSP, CFE

ability to explain the underlying causes of high-tech crimes and to devise practical preventive measures has made him one of the most popular speakers at international business conferences. He also serves on the Board of Advisors for the Center for International Financial Crime Studies at the University of Florida's Levin School of Law.

Mr. Brill is the author or co-author of five books in the field of information security and management, and of dozens of articles that have appeared in publications ranging from *Computerworld* to the *FBI Law Enforcement Bulletin*. His latest book is a new edition of *The Accountant's Handbook of Fraud and Commercial Crime Prevention* (AICPA) which he co-authored with Kroll colleagues. He was featured on the CBS News magazine "60 Minutes" when he was interviewed by Mike Wallace on the subject of Internet security. He has also appeared on Dateline NBC, Good Morning America, CNBC, MSNBC, CBC, BBC and CNN. His work was featured in the U.S. News & World Report article entitled "Corporate Spy Wars." He has spoken at many events for the American Institute of Certified Public Accountants as well as at the National Convention of the American Bar Association. He has also taught at Practising Law Institute, Federal Bar Association and Federal Bar Council functions. He holds the Certified Information Systems Security Professional (CISSP), Certified Fraud Examiner (CFE), and Certified Information Forensics Investigator (CIFI) credentials. He was also featured on The History Channel program, "On the Inside: Cyberterrorism" and a special entitled "Hackers: Outlaws and Angels" for The Learning Channel. He is a member of the High Technology Crime Investigation Association, and was elected to Associate Membership in the American Academy of Forensic Sciences.

Alan also holds an appointment as an Adjunct Professor at National University in San Diego, where he is a faculty member of the school's unique online Masters degree in Forensic Sciences Program.
